

# THINK BIG THINK GLASSWERKS™

## DIGITAL AND SILK SCREENED PRINTING

Glasswerks is proud to offer GlassFX Custom in-glass printing. Our digital printing uses a ceramic-based ink that is applied to the glass surface and then tempered to create an incredibly durable finished product. This state-of-the-art printing system represents one of the fastest-growing trends in the glass and interior design industries and allows us to reproduce virtually any image or pattern on glass surfaces to stunning effect. Ideal for wall-cladding, glass railings, shower doors, or anywhere else where a printed design is needed. GlassFX can even improve sun control, light diffusion, and light transmission to create beautiful, highly functional environments.

# SILK SCREENED GLASS

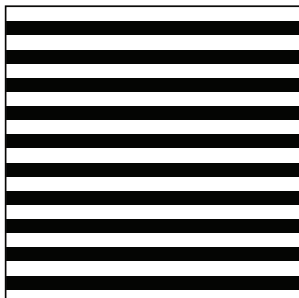

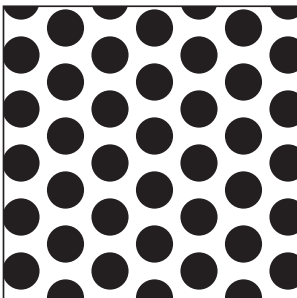

## MAXIMUM SCREEN PRINT SIZE 86" X 158"

Glasswerks' capabilities include traditional Silk-Screened Glass that can be used for both interior and exterior applications to compliment a building's aesthetics, control light transmission, and increase privacy. Once the ceramic frit is applied, the lite is tempered to create an extremely durable product.
