BIRD FRIENDLY GLASS

WORLD-CLASS BIRD PROTECTION

It is estimated that up to **one billion birds die each year** in the U.S. due to glass and building collisions. Bird-Friendly Glass from Glasswerks combats confusing reflections and undesirable bird fatalities by applying our pattern to the primary surface of the glass, allowing birds to avoid invisible threats.

- ✈ Follows 2x4 Rule
- ✈ Prevents Bird Collisions
- ✈ 6 Standard Patterns
- ✈ Eco-Friendly
- ✈ Ultra-Durable Ceramic Ink
- ✈ Etched Glass Patterns
- ✈ Solar Controlled Low-E

Bird-Friendly Glass from Glasswerks is offered on clear and Starphire glass and is applied to the #1 surface of the glass. The pattern is applied with our GlassFX Digital in-glass printing process using an ultra-durable ceramic-based ink. Choose from our 6 standard patterns or speak with an in-house designer about creating a custom design. All of our standard patterns satisfy the 2x4 rule. Birds will generally not fly through spaces more than 2" high or 4" wide.
